Subject: CAD cell locations

Hi Dave,

I was hoping to get the CAD cell design and locations from you for inclusion in the NBH modeling. Earl Hayter and I spoke with Paul Schroeder last week. Earl's in charge of the hydrodynamic modelling components and will need the dimensions, general design (open ended; sheet-pile above water; submerged at 30ft; etc), and location of the CAD cells. It may be most useful to just get the GIS shape files for size and location. We saw in a document that Paul had that Apex had developed design and mapping of the CADs. Perhaps if you talk to them, could you remind them of the bathymetry as well?

Thank you,

Karl
